

Enjoy private treatment even as a student

VOLLMED PLAN UNI GIVES YOU ALL THE ADVANTAGES
OF A PRIVATE PATIENT EVEN WHEN STILL A STUDENT

DKV's UNI Plan gives you private treatment while still a student

You can now opt for private health insurance even before you start your studies. DKV's low-cost student plan makes this an easy decision.

Enjoy the privilege of private treatment

Be it in the doctor's or dentist's surgery or in hospital, you will everywhere enjoy the special advantages of private treatment. And if you prefer to consult an approved practitioner of complementary medicine (Heilpraktiker), that too is no problem for private patients insured with DKV.

Enjoy special service in hospital

When in hospital, you benefit from the comfort of a semi-private room with special services, such as integrated sanitary facilities, telephone at your bedside, radio and TV. Competent professional care will be provided by the senior physician personally.

Secure major future advantages right now

DKV's UNI Plan for students introduces you to major advantages for your later working life. When you graduate, you can easily continue your insurance under a comparable DKV plan – without a renewed health assessment and without qualifying periods.

Cover and benefits in detail
